

robatherm

Air handling units

Engineered in Germany

Excellence in every aspect:

With drive, expertise and industrial precision, we create air handling units (AHUs) that ensure clean air.

QUALITY ENGINEERED IN GERMANY
As a technology driven company, robatherm lives on the ambitions of its staff to consistently develop better solutions and products.
Versatile, highly automated production sites in Germany and Thailand with 6th generation mature operating processes as well as established knowledge and commitment of our staff are the key to fulfilling your requirements.

INDIVIDUAL AND STANDARDIZED
Individual product solutions and standardized work processes need not be contradicting – on the contrary.
The combination of automated production processes and our employees' expertise enable the production of air handling units that suit the most diverse requirements at a consistent high level of quality.

AUTOMATED PRODUCTION

robatherms highly automated production in Thailand and Germany combined with proven engineering ensures consistent high quality, efficient processes and reliable lead times.

USE CASES AND APPLICATIONS

Our systems are designed for a wide range of demanding applications including Pharmaceuticals, Hospitals, Laboratories, Climate Controlled Storage/Warehousing, Data Centres, Sports Venues (e.g. Olympic facilities), Processing Plants and Outside Air Processing (DOAS).

ABOUT AG SOLUTIONS

At AG Solutions, we focus on delivering HVAC solutions that are fit for purpose, only working with high quality, reliable and innovative products such as robatherm.

AG SOLUTIONS
ENGINEERED HVAC PRODUCTS

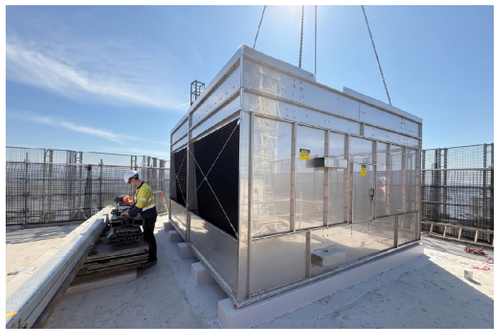

Our people are experts in the industry and provide guidance through the whole process from concept to completion, ensuring the ideal solution is delivered for any project.

ENGINEERED HVAC PRODUCTS

Quality shines in every detail.

Pitched door frame. Unique gasket in partnership with Bosch refrigerator.

Hygienic by design. Door frame below floor for easy wipe down.

Door stopper mechanism to prevent the door from slamming shut unintentionally.

Drain pan with a rounded draining rim for complete emptying. Robotic welding for premium result. Hygienic.

Fans with EC motors allow excellent cleanability of the AHU.

Fan array options.

To turn air into performance, we create an environment that fosters practical expertise, industrial precision, and crafts-manship. A spirit of partnership and a long-term perspective form the foundation for this.

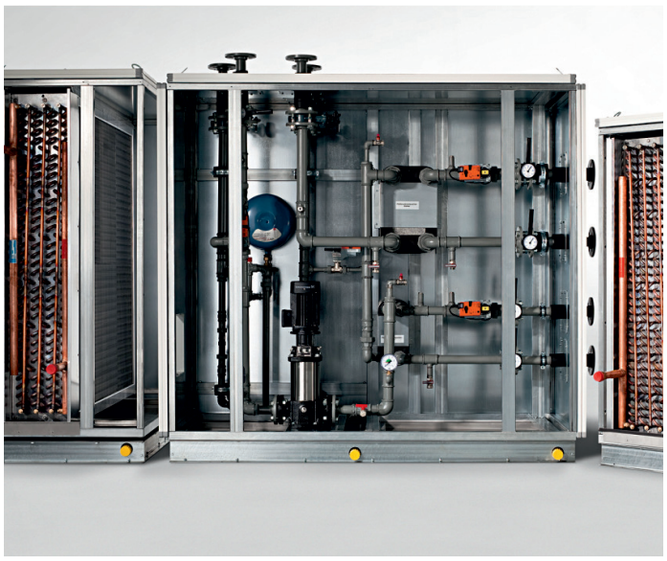

We continuously invest in technology, expertise, and our people to ensure we consistently deliver the highest quality in response to each customer's specific needs.

Watch our
video factory tour

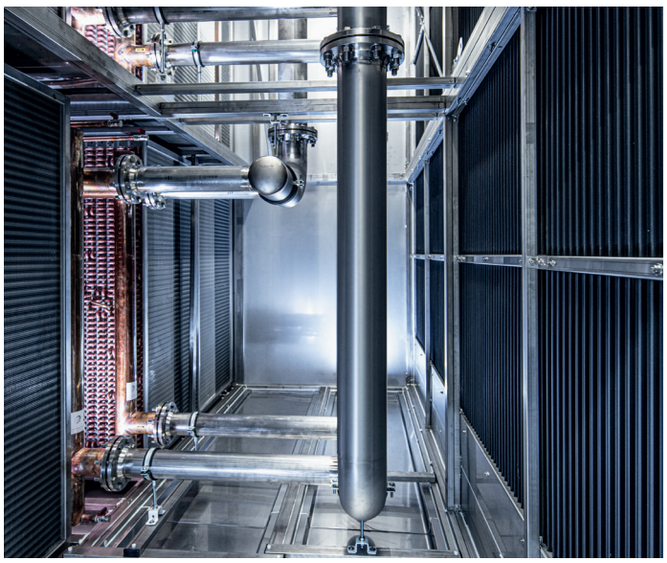

Flat commercial membrane roof. No cracking and degradation over time.

Piping completely integrated in the AHU for a Run-Around-Coil.

Unique structural frame allows support of duct, piping, even condensing units.

Cooling coil piping and connections inside the AHU.

Low Leakage damper edge & lip seals. Reliable, leak tight.

Delivery in one piece in order to reduce labor on-site.

The quality of our air handling units is reflected in details based on decades of experience.

Questions?

Our partner AG Solutions will be happy to advise you on the many possibilities offered by robatherm.

AG Solutions provides support through the whole project process, from early conceptual design to completion and ongoing support.

Services provided:
+ Design & Selection Advice
+ On-site Commissioning & Guidance
+ Service & Warranty Support
